

Swim in natural mineral water

Origin Aqua's Mineral+Biome® system creates mineral water that protects your skin and hair, is more economical to run and better for environment

ORIGIN AQUA

Chemical Free. Naturally.

Five reasons for choosing Origin Aqua Mineral+Biome® system for your pool

ORIGIN AQUA

Zero pollution for you or the environment

Because we use natural bacteria rather than chemicals there are no toxic by-products or nasty odours

Health promoting & healing

Our water is enhanced with beneficial microbes and minerals including selenium and magnesium known for reducing inflammation and boosting skin health

Modular & easy to install

Plug and play filter means any pool (new-build or retrofit) can be upgraded to the Mineral+Blome system in as little as one day

50% less energy and water usage

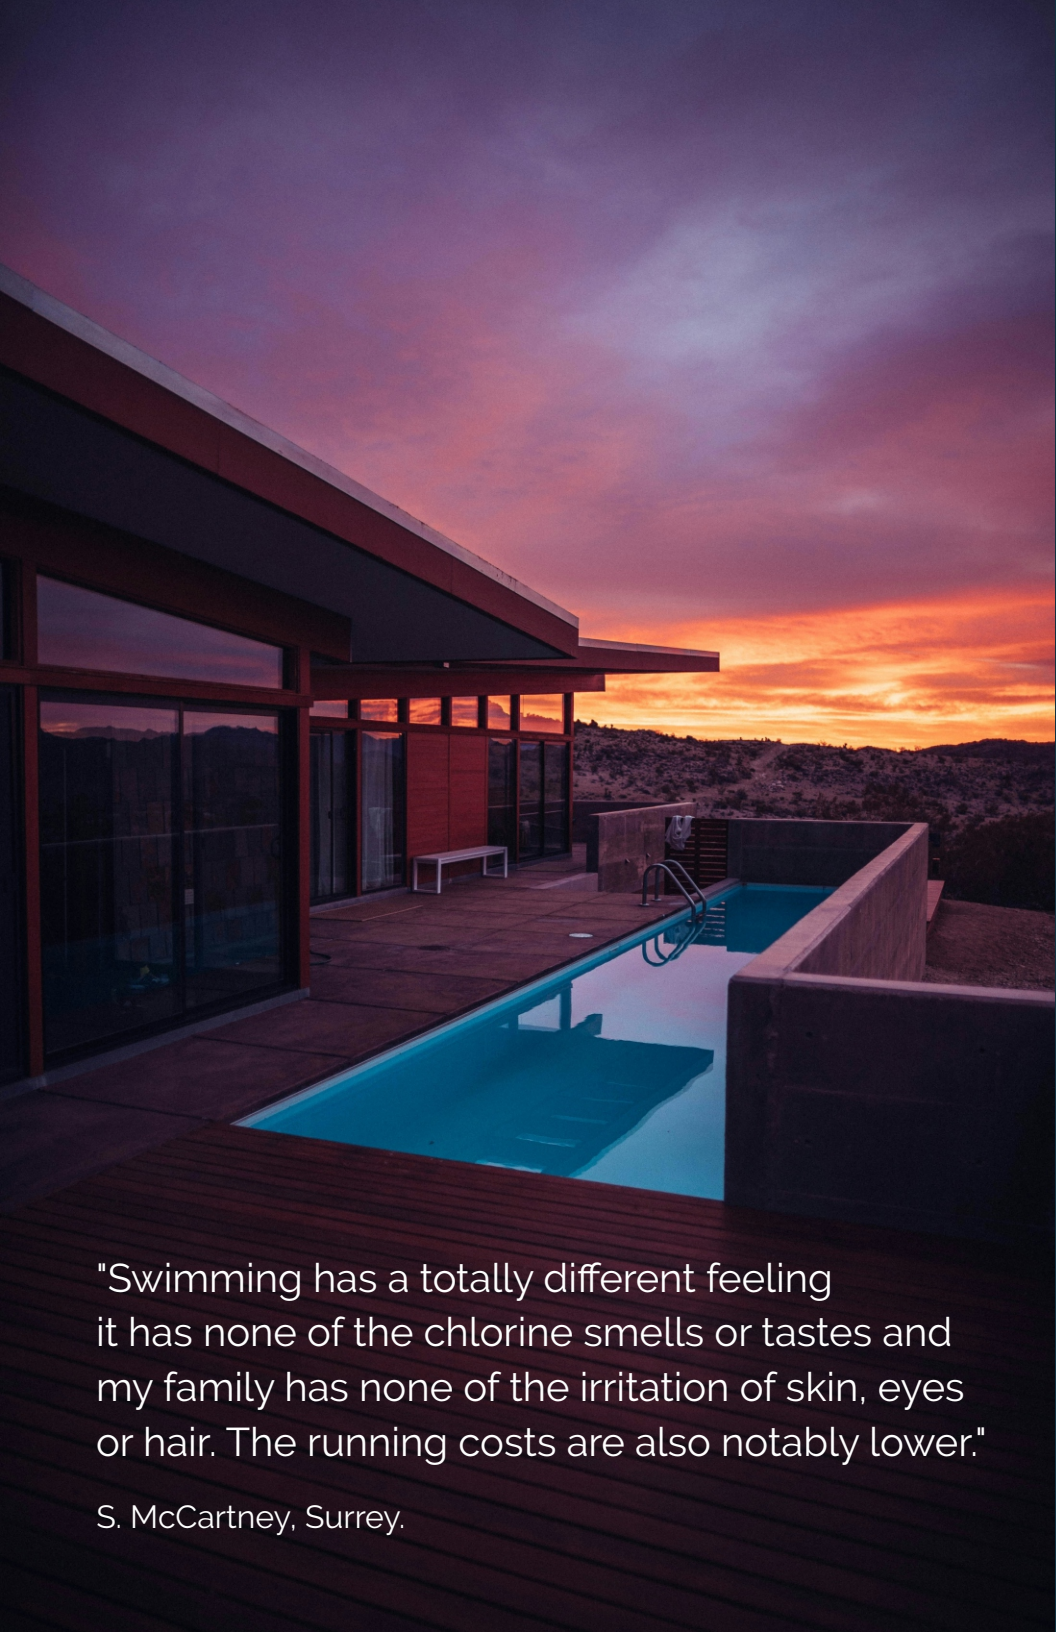

Our system uses 50% less energy and 50% less wastewater resulting in huge savings on running costs

Less maintenance

Zero chlorine means no need for testing pH adjustments or shock dosing. Hence fewer maintenance visits are required

"Swimming has a totally different feeling it has none of the chlorine smells or tastes and my family has none of the irritation of skin, eyes or hair. The running costs are also notably lower."

S. McCartney, Surrey.

How it works

Billions of **beneficial bacteria** control algae and pathogens by continually starving the water of key nutrients, such as phosphorous

Beneficial microbes out-compete dangerous bacteria through biological 'predation'

Our unique mineraliser adds **thermal spa minerals** such as magnesium and selenium that have proven health benefits

Ammonia oxidizing bacteria produce nitrites and nitric oxide that help to **balance your skin's microbiome**

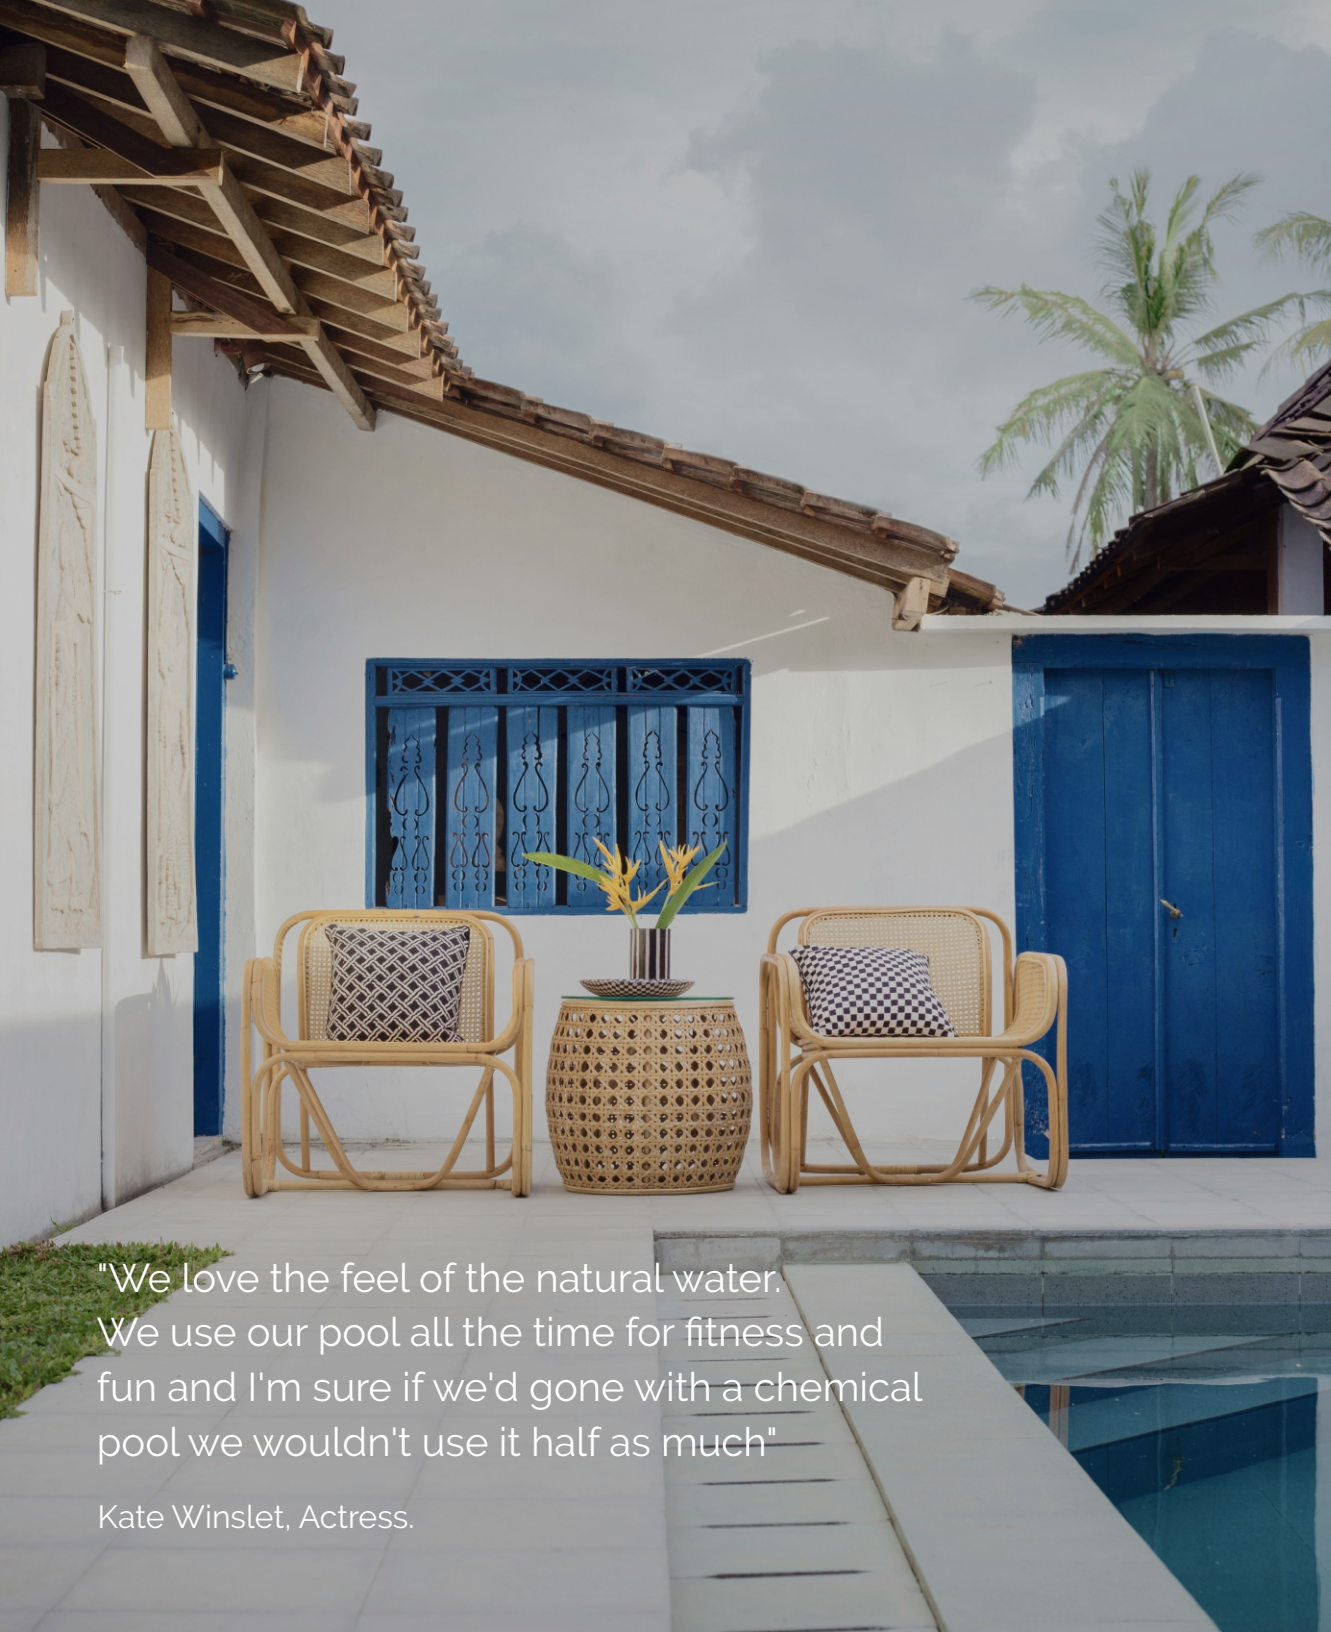

Crystal clear water; exceeds EU "excellent" freshwater bathing standards by 100x

Comes with advanced IoT control, for **automated system maintenance & remote monitoring**

ORIGIN AQUA

"We love the feel of the natural water.
We use our pool all the time for fitness and
fun and I'm sure if we'd gone with a chemical
pool we wouldn't use it half as much"

Kate Winslet, Actress.
